

New Director

Blake Ligtenberg is the new Director for District No. 3 Chester, Grandview and Valley Townships.

Blake grew up in the area until 2002 and then went to Sioux Falls to get an Associate's Degree in Automotive Technology. He worked as a mechanic in Sioux Falls until 2014 and then moved back to help on the farm where he raises wean to finish pigs.

Blake has a fiancé Stacey and 2 adult sons. Blake is a EMT with the Armour Ambulance, he enjoys hunting, fishing and small town lifestyle.

Douglas Electric Cooperative Connections is the monthly publication for the members of Douglas Electric Cooperative, 27913 US Hwy 281, Armour, SD 57313-5726. Families subscribe to Cooperative Connections as part of their electric cooperative membership. The purpose of Douglas Electric Cooperative Connections is to provide reliable, helpful information to electric cooperative members on electric cooperative matters and better rural living. Subscription information: Douglas Electric Cooperative members devote 50 cents from their monthly electric payments for a subscription. Non-member subscriptions are available for \$12 annually. Periodicals Postage Paid at Armour, SD 57313 and at additional mailing offices. POSTMASTER: Send address changes to Douglas Electric Cooperative Connections, 27913 US Hwy 281, Armour, SD 57313-5726, Phone (605) 724-2323; Fax (605) 724-2972; e-mail sheila@douglaselec.coop

In case of a power outage, call (605) 724-2323

MISSION STATEMENT Dedicated to provide safe, low-cost reliable electricity to all our Members.

Win a Trip to Washington D.C.

Douglas Electric will once again sponsor a high school Junior or Senior on an all-expense-paid trip to Washington, D.C. Each June, over 1800 high school juniors and seniors travel to Washington, D.C., to participate in the Rural Electric Youth Tour. During the week, they learn about Washington, D.C., government, cooperative philosophy, and rural electrification. The students are selected and sponsored by their local rural electric cooperatives. The South Dakota Rural Electric Association (SDREA) coordinates arrangements for the South Dakota students.

Some of the sites toured are the Lincoln Memorial, National Cathedral, The White House, Air and Space Museum, Washington Monument, U.S. Capitol, Ford's Theatre, The Kennedy Center, the Metro, Arlington National Cemetery, Mount Vernon, Tomb of the Unknown Soldier, The Smithsonian, Iwo Jima Statue, National Archives, U.S Supreme Court, and the Vietnam Veterans Memorial. Students will participate in a breakfast briefing with the South Dakota Congressional Delegation.

Who is Eligible? All area high school juniors and seniors whose parents are members of **Douglas Electric Cooperative**, **Inc.**

What Does It Cost? Douglas Electric, along with the other local electric cooperatives that participate in the weeklong event, funds the tour. The funding for the tour provides for each participant's transportation, room and board, entertainment, and sightseeing events. Students are required to provide their spending money (snacks and souvenirs).

When is it Held? The weeklong trip will be held on June 17-23, 2023. Participants will meet for an orientation meeting on Saturday, June 17 in Sioux Falls. Then, the group will fly to D.C. on Sunday, June 18, and return to South Dakota on Friday, June 23. A commercial bus will be used for transportation while in D.C.

How do I Qualify? Each Entrant must submit an essay, not to exceed 500 words, on the following topic: "If chosen as a youth tour delegate, you will be traveling to Washington, D.C. to experience and learn about America's rich history. What moment in American history do you wish you had been a part of, and what would you have contributed?" All essays must be typed and include a cover sheet that states the title of the essay, the entrant's name and address, name of parent or guardian, and the name of your school.

Information may be picked up from:

Douglas Electric 27913 US Hwy 281 Armour SD 57313 (605) 724-2323 OR Your School Counselor

Essay must be returned to Douglas Electric by: **December 20, 2022.**

Deck your halls with home safety in mind

It's time to deck those halls - safely. More than 800 home fires are caused by holiday decorations each year, according to the National Fire Protection Association.

An additional 170 home fires are caused by Christmas trees each year. Keep these tips in mind for a safe holiday season:

- Carefully inspect all electrical decorations before you use them. Cracked or damaged sockets and loose or exposed wires can cause serious shock or start a fire.
- Make sure all extension cords and electrical decorations are being used properly - indoor-rated cords indoors, outdoor-rated cords for outside decorations.
- Inspect extension cords for damage and discard (not repair) any that are not completely intact.
- Never mount or support light strings in a way that might damage the cord's insulation.
- Outdoor electrical lights and decorations should be plugged into circuits protected by ground-fault circuit interrupters.
- Exercise caution when decorating near power lines. Keep yourself and your ladder at least 10 feet from power lines.
- Turn off all indoor and outdoor electrical decorations before leaving home or going to sleep.
- Avoid overloading electrical outlets with too many decorations or electrical devices. They can overheat and cause
- Never connect more than three strings of incandescent lights together.
 - Water your Christmas tree daily.
- Keep all decorations at least 3 feet away from heating
- Avoid using candles. The flames are just too dangerous with all the flammable decorations around.
- Purchase electrical decorations from reputable retailers and that are approved by a nationally recognized testing lab such as UL, Intertek or CSA.

A NEW TEACHING TOOL FOR **SOLAR POWER EDUCATION**

Rushmore Electric and Touchstone Energy have joined together to construct a demo trailer designed to teach co-op members across the state more about how solar power functions. The trailer is equipped with fold-out collection panels and also battery storage capability. Co-op energy experts use the trailer to

frame discussions about net metering, interconnection agreements and more.

To see a video of the trailer and learn more about how electric cooperatives serve our members, visit Cooperative Connections Plus by scanning the QR code at right.

Don't play on transformer boxes

Olaf Sahlstrom

Olaf Sahlstrom, 9, shares a tip he learned from his parents, Ben and Naomi Sahlstrom: Double-tapped breakers are unsafe and can lead to overheating, arcing, and electrical fires. The Sahlstroms reside in Tracy, MN and are members of Lyon-Lincoln Electric Cooperative.

Kids, send your drawing with an electrical safety tip to your local electric cooperative (address found on Page 3). If your poster is published, you'll receive a prize. All entries must include your name, age, mailing address and the names of your parents. Colored drawings are encouraged.

Patty Sinning, Lennox

Elaine Rieck, Harrisburg

phone number and cooperative name.

Q: How can I keep my home warm while saving on my electric bill this winter?

A: Winterizing is an important step to keep your home cozy and your bills low. These tried-and-true methods will ensure your home is sealed tight and ready for colder weather. I've also included tips that address common misconceptions.

INSULATING PIPES AND WATER HEATER

You can raise the water temperature inside your home's water pipes by 2 to 4 degrees by insulating, according to the U.S. Department of Energy (DOE). Insulating allows you to turn down the heat on your water heater, saving energy and money.

Start by insulating the pipes coming out of your water heater. If you have a gas water heater, keep pipe insulation at least 6 inches away from the flue. Insulate hot and cold water lines. The latter can prevent condensation and freezing pipes. Insulating your water heater can save 7% to 16% on water-heating costs, DOE says. Insulation kits are available at hardware stores. Don't obstruct the pressure relief valve, thermostats or access valves.

Air sealing and insulation are a great combination for minimizing home energy use. Insulation is like a warm sweater for your home, and air sealing is the wind breaker. All the cracks, gaps and holes in a home can be like having a window open yearround. Air sealing eliminates those leaks. It can be done as a do-it-yourself project or by a professional.

WINDOW SEALING AND **IMPROVEMENTS**

Windows can be a source of drafts and wasted energy. Close windows tightly.

Add weatherstripping around windows to prevent warm air from escaping your home and caulk the gaps where the window trim meets the wall and the window frame. Add curtains to make the room feel

Storm windows are a lower-cost option for upgrading single-pane windows. They are available with low-emissivity coatings, which insulate better, and are available for installation either from the inside or outside of the window.

When I was little, my dad told me it was too cold to have a fire. I remember thinking that made no sense, but he was right.

We had an open, wood-burning fireplace—not a wood stove. A fireplace can draw the warm air out of the house, cooling it down or causing your heating system to use more energy.

Your fireplace adds ambiance to your home but isn't necessarily effective at heating it. If you have a wood-burning fireplace, close the damper when your fire is extinguished. An open damper in the winter is an easy exit for the air you paid to heat.

Adding tempered glass doors to a wood-burning fireplace can create an extra buffer between the cold outside and a cozy living space.

Some gas fireplaces require a damper to remain permanently open so gas can vent out of the home. Check the specifications of your unit to ensure safe

BEST PRACTICES FOR CLOSING OFF PARTS OF A HOME

Through the years, I have heard a lot of debate about closing off rooms or parts of the home to save

Best practices come down to the type of heat source. If you have a zonal heating system, where individual areas are controlled separately, you can close doors and only heat the areas you use. Examples of zonal systems are wall heaters, baseboard heat, hydronic radiant heat, radiators and ductless heat pumps, also called mini-splits.

Keep areas with plumbing or water lines warm enough so pipes do not freeze.

If you have a central forced-air heating system, leave doors open to all heated areas. Closing doors and/or register dampers forces the system to work harder, uses more energy and can shorten the life of heating equipment.

CHECK YOUR FILTERS

Maintaining a clean filter in your furnace is one of the best ways to keep it running efficiently and prevent costly repairs. Check your furnace or ductless heat pump filter monthly during peak heating season.

The Clauses share stories of Christmas seasons past

Billy Gibson

billy.gibson@sdrea.coop

If you want to be a big-time Santa, it's all about the beard.

These days, there's no place in the department store Santa scene for spurious scruff. Don't even try faking it. The kids can spot a fraud from halfway across the food

Sporting a convincing set of whiskers is how Curt Winquist scored a serious primetime Santa gig more than 10 years ago.

He always dressed up as Santa Claus each Christmas to entertain local kids using the same homemade suit that his dad donned before him. But as it often happens with middle aged men and their suits, this one started shrinking and getting appreciably tighter...especially around the mid-section.

So, Winquist found himself shopping for a new suit at a costume store in Sioux Falls when he was approached by a stranger who just so happened to be connected with a photography company. She took one look at the humble farmer from Alcester and told him he was about to join the top ranks as a "professional department store Santa."

"I told her I only knew how to farm and milk cows," Winquist recalled. "She put my name on the standby list and later I got a call. They said a Santa at a mall in Connecticut had a heart attack and died and they needed someone right away. I didn't even have time to get ready. It was on-the-job training."

He soon found himself being flown to the Brass Mill Center located in Waterbury, CT. For the next 38 days, he played Santa for upwards of 14,000 kids, some of whom only met with failure when they tried to yank off his beard.

Winquist, who is a member of Union

Carla and Curt Winquist of Alcester enjoy entertaining hundreds of children each holiday season.

County Electric while his son is a lineman at Southeastern Electric, spent the next six years traveling to Waterbury each Christmas season. The company he worked for put him up in the local Hilton and provided a security team each morning as he made his way to breakfast in the hotel restaurant and then off to the mall. It was strongly suggested that he not leave the hotel for any other reason lest he be spotted by mall patrons and his identity revealed.

Even his wife, Carla, got in on the act and served as Mrs. Claus for several seasons. The Connecticut gig ended in 2017, and these days the two are seen at smaller and more private venues such as day care centers, nursing homes, birthday parties and schools.

Along the way, the Winquists discovered that portraying Santa and Mrs. Claus doesn't always come with lots of laughter and bellies that shake like jelly.

Especially in December of 2012. That's the year, just three weeks before Christmas, that 26 people where shot and killed at Sandy Hook Elementary in Newtown, CT. The massacre occurred just 20 miles from the mall where Winquist worked each season.

Winquist found himself having to take the service elevator and exit through the back door to evade kids in the hotel lobby.

"There were families of the victims who were staying at the hotel and they were upset and crying and we didn't want the kids to see Santa walking through the lobby in that situation when they were heading out to funerals," he said. "It was just horrible because there was such grief, but then there were people who had no connection to the killings and they just wanted things to be normal. I had to switch my mind on and off. You just want to make the kids and the families feel better."

The Winquists have reams of stories to tell from the past as they continue their roles as the Claus couple from the North Pole. In fact, they've written a book about their experiences entitled "Santa's Christmas Diary," which is available on Amazon.

"It has been a big thrill for us. We work pretty well together as a team," Curt said. "She does a good job of calming kids down when they get nervous about sitting on Santa's lap, or if the lines get long and the kids start getting antsy. I love Mrs. Claus!"

LeRoy ledema, Richard Ringling and Duane Strand crank out nearly 60,000 toy cars each year from their 12x10-foot workshop in Platte. Photo by Billy Gibson

Duane Strand gets lots of 'smileage' out of making toy cars for children

Billy Gibson

editor@sdrea.coop

Frustrated moms across the ages have been searching for a surefire method for getting an unruly child to simmer down.

Duane Strand is pretty sure he's found a failsafe solution: toy cars.

Several years ago, Strand began building tiny wooden cars in his nondescript backyard shed in Platte. He recalls visiting Pierre one evening and having dinner at a local restaurant when a young boy suddenly started pitching a fit and hollering at the top of his lungs.

Strand just happened to have one of the cars in his pocket. He reached out and handed it to the child and was rather amazed at the result. Not only did the whining stop forthwith, but that boy's frown turned upside down as the

kid started beaming from ear to ear.

"He quit yelling right then and there. His whole attitude changed," Strand recalls. "These cars really have a soothing effect on the kids."

That's the impact Strand is shooting for as he and his three-man team of retirees crank out nearly 60,000 toy cars each year. They're looking to squeeze all the "smileage" they can get out of the toy cars they build.

The main construction crew includes retired farmer Richard Ringling and retired mechanic LeRoy Iedema. Ringling usually works the drill press to create holes in the wood where the axles will go. Then Iedema follows up by pressing the wheels onto the axles. He came up with a way to make sure the wheels roll straight and stay in place and dares anyone to try and pull off a wheel.

There are others who join in the

process: Justin Kok cuts the wood into manageable blocks; Brett Wynia performs repairs on the drill presses, band saws, sanders, routers and other pieces of equipment when they break down; and Curtis Versteeg helps to sand down the rough surfaces on the cars.

Toy cars are distributed by military personnel serving overseas.

And just down the road from the shop is the Platte Lumber Yard, where many of the material supplies are stored until needed for production. Strand said it was the folks down at the lumber yard who initiated the vital connection with

Boyds Hardwood Gunstock that keeps the operation humming along.

"Without Boyds we wouldn't be able to do any of this," Strand said.

Dustin Knutson, a member of Central Electric Cooperative and part owner of the company that bills itself as the largest after-market gun stock maker in the world, is a Shriner with a heart for community service and said he was allin when Strand approached him about supporting the program by supplying excess wood.

"They're really easy to work with," he said, noting that he keeps one of the cars on his desk. "They take whatever they can get and they show up consistently. We started saving off-cut blocks of wood specifically for the cars. The laminated wood works well because it's colorful and looks good and the kids can pick out their favorite one."

Strand's distribution system is a bit scatter shot but he still manages to send them all over the globe. Anyone he knows who is planning a trip gets a supply of cars. Knutson, for instance, takes them with him when he travels for business or pleasure, whether vacationing in Mexico or hunting in Africa.

Dustin Knutson of Boyds Hardwood Gunstock supplies the toy makers with the laminated wood used to create the tiny cars (inset) for worldwide distribution. Photo by Billy Gibson

"People in America may think these are just simple toys, but I've been in parts of the world where a toy for a kid is a stick and a rock," Knutson said. "But these little cars give kids something to smile about. Duane and his guys are just beautiful people doing good things for the good of humanity and we're happy to help them any way we can."

The toys also ride along in ambulances, military satchels and police vehicles in the event a child needs to be calmed. They show up in doctor's offices, churches and other venues.

The operation is affiliated with a group called Toys for God's Kids, a non-denominational organization based in Denver. Strand is the only affiliated "smile maker" in South Dakota.

While the three-man crew claims they're working harder than they used to before retiring, Iedema assigns a greater value to his toil beyond the opportunity to put a smile on a kid's face. He said his heart doctor has informed him that he's in better shape than before he started woodworking three years ago. He's slimmer, more active and feels a lot better.

Strand chips in, "...yeah, and he's

Number of tiny cars made last year

59,640

by Duane Strand and his toy making team in Platte

more ornery than ever, too!"

Collectively, the guys crank out about 250 cars a day scrunched inside the 12 x 10-foot shed. Each unit has to be dipped in linseed oil to protect children from any potential toxicity. The toys are boxed and shipped to their destination at the recipient's expense.

Strand doesn't know how much longer he's going to be able to keep cranking out cars. He'll reach the age of 90 in a few months and his friend Ringling has a plan: "I told him when he turns 90 we're going to take him up by the interstate and take a picture underneath the sign that says I-90. Get it?"

Douglas Electric Accepting 2023 Scholarship Applications

Douglas Electric, in conjunction with Basin Electric Power Cooperative, is offering a \$1,000 college scholarship to a student, whose parents are members of Douglas Electric.

The scholarship program recognizes and encourages the academic achievements of students in its region. It also serves as an investment in the economic future of rural areas.

Applicants for the scholarship must be a U.S. citizen and a dependent of Douglas Electric consumers. Applicants also must be a student enrolled or planning to enroll in a full-time graduate or undergraduate course of study at an accredited two-year or four-year college, university or vocational/technical school.

The scholarship recipients are chosen based on a combination of SAT/ACT scores, overall grade-point average, work experience, participation in school and community activities, a personal statement of career goals, applicant appraisal by a third party and an essay.

Applications have been sent to the local schools and can also be received at the office of Douglas Electric. Applications must be returned to Douglas Electric by February 10.

For more information, contact (605) 724-2323.

Statement of Nondiscrimination

In accordance with Federal civil rights law and U.S. Department of Agriculture (USDA) civil rights regulations and policies, the USDA, its Agencies, offices, and employees, and institutions participating in or administering USDA programs are prohibited from discriminating based on race, color, national origin, religion, sex, gender identity (including gender expression), sexual orientation, disability, age, marital status, family/parental status, income derived from a public assistance program, political beliefs, or reprisal or retaliation for prior civil rights activity, in any program or activity conducted or funded by USDA (not all bases apply to all programs).

Remedies and complaint filing deadlines vary by program or incident. Persons with disabilities who require alternative means of communication for program information (e.g., Braille, large print, audiotape, American Sign Language, etc.) should contact the responsible Agency or USDA's TARGET Center at (202) 720-2600 (voice and TTY) or contact USDA through the Federal Relay Service at (800) 877-8339. Additionally, program information may be made available in languages other than English.

To file a program discrimination complaint, complete the USDA Program Discrimination Complaint Form, AD-3027, found online at http://www.acsr.usda.gov/ complaintfilingcust.html and at any USDA office or write a letter addressed to USDA and provide in the letter all of the information requested in the form. To request a copy of the complaint form, call (866) 632-9992. Submit your completed form or letter to USDA by:

(1) mail: U.S. Department of Agriculture Office of the Assistant Secretary for Civil Rights 1400 Independence Avenue, SW Washington, D.C. 20250-9410; (2) fax: (202) 690-7442; or (3) email: program. intake@usda.gov.

USDA is an equal opportunity provider, employer, and lender.

Treatment center helps young people get back on the right path

Billy Gibson

billy.gibson@sdrea.coop

It was a small compliment, but it meant everything to the young lady who wasn't quite accustomed to receiving positive reinforcement. A simple affirmation spoken softly and sincerely into her ear: "You're gorgeous, and you're worthy." And the tears began to flow.

The Indian Health Service Great Plains Youth Regional Treatment Center near Mobridge is a place where at-risk youth can go to address their challenges with drug and alcohol abuse and find the support they need to deal with difficult situations.

Acting Clinical Director Charita Dowdell remembers that encounter with the young woman.

"I tell all of our residents how gorgeous they are and that I see the beauty in them and who they are deep down inside," Dowdell said. "I told her she was worthy and that she had value,

and she just broke down. She told me that nobody had ever said that to her."

That's just one of the stories about how the treatment center's staff strive to change the lives of teens who enter the program. There are many others.

Program Director Lavon Booth has been involved with the residential program for 20 years, initially as an administrative officer when she started in 2002. She previously served at the Cheyenne River Service Unit in her hometown of Eagle Butte before starting at the YRTC.

She sees the transformation of residents captured in plain view during graduation ceremonies that take place when the 12-week session concludes.

"We're very fortunate to see the change that happens in our residents from the time they arrive until the time they graduate," she said. "We see them moving in a positive direction and at graduation we get to hear them speak intimately about what they've learned and you see how it all comes together.

They come in very shy and reserved, and they leave here carrying a more positive spirit and more confidence. It's really touching for us and very rewarding."

The treatment center is housed in the old Chief Gall Inn hotel on land leased from the Standing Rock tribe. Youth between the ages of 13 and 17 are referred through tribal alcohol programs, local schools, community service organizations and other agencies.

According to the center's mission statement, the program "is dedicated to promoting a healthy lifestyle restoring balance and harmony in mind, body and spirit to our American Indian youth and their families."

Dowdell said playing a role in watching that mission statement come true to life in the form of changed behaviors and more positive attitudes makes her know she's definitely making a profound difference.

One effective modality is a mentoring program where residents taking part in the rehabilitation process shepherd those who are just entering the facility. Not only do the incumbent residents show the newbies around the physical

CHANGING LIVES

The youth treatment center is located in the former Chief Gall Inn hotel near Mobridge. Photo by Roger Lawien

space, but they also listen to their concerns, answer questions and try to allay their fears that stem from living in a new environment with certain rules, guidelines and expectations.

"When they start feeling homesick or afraid or stressed and they just need someone near their age to talk to, it helps them make the adjustment so they can settle down and focus on what they need to do to make changes. That bond is something that actually helps both of them get through and graduate successfully," she said.

Dowdell noted there is a concern among staff about residents returning to a challenging environment. So, upon graduation, the youth receive support through a tracking system where staffers make regular check-in calls after three days, three months, six months and a year. A tele-health network is also

available to the graduates.

Role-playing also helps re-integration, Dowdell said. She added that the residents are taught to anticipate the same kind of challenges they faced before and how to handle them with a different approach.

"They return as a changed person, but everybody else around them will be doing the same things," she said. "We tell them to stay connected to their support system and manage their emotions; how to be true to yourself while being respectful to others. We prepare them for what life is going to look like when they leave."

She mentioned one particular youngster who entered the program with a defiant attitude and dealing with depression, anxiety and post-traumatic stress. She knuckled down academically and caught up to her class grade. After

graduation, she returned to juvenile detention for seven months. But in the end, she straightened out her life by applying the things she learned at the center.

"She struggled with treatment, but she sent us a letter thanking us for what the program did for her," Dowdell said. "She said she was grateful for giving her the skills to manage the difficult predicament she was going through. She changed her mentality and grew and matured and became a new person."

Dowdell stressed that parents can play a key role in helping their children navigate through rehabilitation or prevent them from becoming a candidate in the first place.

"Listen to your children," she emphasized. "They are saying something to you, but often they don't feel like they're being heard. Before you shut that door, listen to what they're saying. You may have to shut the door anyway, but at least take the time to listen to what they have to sav."

Lavon Booth, left, and Charita Dowdell, work to provide students the skills they need to change the direction of their lives.

LeRoy ledema, Richard Ringling and Duane Strand crank out nearly 60,000 toy cars each year from their 12x10-foot workshop in Platte. Photo by Billy Gibson

Duane Strand gets lots of 'smileage' out of making toy cars for children

Billy Gibson

editor@sdrea.coop

Frustrated moms across the ages have been searching for a surefire method for getting an unruly child to simmer down.

Duane Strand is pretty sure he's found a failsafe solution: toy cars.

Several years ago, Strand began building tiny wooden cars in his nondescript backyard shed in Platte. He recalls visiting Pierre one evening and having dinner at a local restaurant when a young boy suddenly started pitching a fit and hollering at the top of his lungs.

Strand just happened to have one of the cars in his pocket. He reached out and handed it to the child and was rather amazed at the result. Not only did the whining stop forthwith, but that boy's frown turned upside down as the

kid started beaming from ear to ear.

"He quit yelling right then and there. His whole attitude changed," Strand recalls. "These cars really have a soothing effect on the kids."

That's the impact Strand is shooting for as he and his three-man team of retirees crank out nearly 60,000 toy cars each year. They're looking to squeeze all the "smileage" they can get out of the toy cars they build.

The main construction crew includes retired farmer Richard Ringling and retired mechanic LeRoy Iedema. Ringling usually works the drill press to create holes in the wood where the axles will go. Then Iedema follows up by pressing the wheels onto the axles. He came up with a way to make sure the wheels roll straight and stay in place and dares anyone to try and pull off a wheel.

There are others who join in the

process: Justin Kok cuts the wood into manageable blocks; Brett Wynia performs repairs on the drill presses, band saws, sanders, routers and other pieces of equipment when they break down; and Curtis Versteeg helps to sand down the rough surfaces on the cars.

Toy cars are distributed by military personnel serving overseas.

And just down the road from the shop is the Platte Lumber Yard, where many of the material supplies are stored until needed for production. Strand said it was the folks down at the lumber yard who initiated the vital connection with

Boyds Hardwood Gunstock that keeps the operation humming along.

"Without Boyds we wouldn't be able to do any of this," Strand said.

Dustin Knutson, a member of Central Electric Cooperative and part owner of the company that bills itself as the largest after-market gun stock maker in the world, is a Shriner with a heart for community service and said he was allin when Strand approached him about supporting the program by supplying excess wood.

"They're really easy to work with," he said, noting that he keeps one of the cars on his desk. "They take whatever they can get and they show up consistently. We started saving off-cut blocks of wood specifically for the cars. The laminated wood works well because it's colorful and looks good and the kids can pick out their favorite one."

Strand's distribution system is a bit scatter shot but he still manages to send them all over the globe. Anyone he knows who is planning a trip gets a supply of cars. Knutson, for instance, takes them with him when he travels for business or pleasure, whether vacationing in Mexico or hunting in Africa.

Dustin Knutson of Boyds Hardwood Gunstock supplies the toy makers with the laminated wood used to create the tiny cars (inset) for worldwide distribution. Photos by Billy Gibson

"People in America may think these are just simple toys, but I've been in parts of the world where a toy for a kid is a stick and a rock," Knutson said. "But these little cars give kids something to smile about. Duane and his guys are just beautiful people doing good things for the good of humanity and we're happy to help them any way we can."

The toys also ride along in ambulances, military satchels and police vehicles in the event a child needs to be calmed. They show up in doctor's offices, churches and other venues.

The operation is affiliated with a group called Toys for God's Kids, a non-denominational organization based in Denver. Strand is the only affiliated "smile maker" in South Dakota.

While the three-man crew claims they're working harder than they used to before retiring, Iedema assigns a greater value to his toil beyond the opportunity to put a smile on a kid's face. He said his heart doctor has informed him that he's in better shape than before he started woodworking three years ago. He's slimmer, more active and feels a lot better.

Strand chips in, "...yeah, and he's

Number of tiny cars made **last** year

59,640

by Duane Strand and his toy making team in Platte

more ornery than ever, too!"

Collectively, the guys crank out about 250 cars a day scrunched inside the 12 x 10-foot shed. Each unit has to be dipped in linseed oil to protect children from any potential toxicity. The toys are boxed and shipped to their destination at the recipient's expense.

Strand doesn't know how much longer he's going to be able to keep cranking out cars. He'll reach the age of 90 in a few months and his friend Ringling has a plan: "I told him when he turns 90 we're going to take him up by the interstate and take a picture underneath the sign that says I-90. Get it?"
